

RadSite™
Accreditation Reinvented

Cone Beam CT Accreditation Overview

Discover innovative accreditation standards for dental and medical Cone Beam CT imaging.

Point-of-care imaging is growing, along with the opportunity for higher-fidelity diagnostic imaging for certain types of dental and medical procedures. This expansion creates a significant public policy need to ensure quality-based and effective Cone Beam CT imaging. After a three-year standards development effort, RadSite has addressed this need with the introduction of the Cone Beam CT MAP Accreditation Standards, version 1.0.

RadSite's new Cone Beam CT MIPPA Accreditation Program (MAP) Standards launched in spring of 2021.

- Covers dental/maxillofacial, ENT, orthopedic, and podiatric services as specialty areas for Cone Beam CT imaging systems.
- Recognized by the U.S. Centers for Medicare and Medicaid Services (CMS) pursuant to the Medicare Improvements for Patients and Providers Act (MIPPA).
- Includes innovative standards such as image quality and physics testing.
- Offers a competitive pricing structure with discounts available for multiple imaging systems and rural locations.
- Uses a simple, secure online accreditation application that can be configured to pre-populate fields for streamlined data entry.
- Provides access to a personalized, dedicated account manager to answer all questions and serve as an ongoing resource.
- Establishes feedback loops to improve imaging supplier performance.
- Utilizes and promotes research and public policy initiatives to promote quality-based imaging.
- Promotes access to educational materials including blogs, issue briefs, webinars, and other resources.
